

Flexibility is standard

Solutions for producing film, laminating paper, textiles or non-woven products!

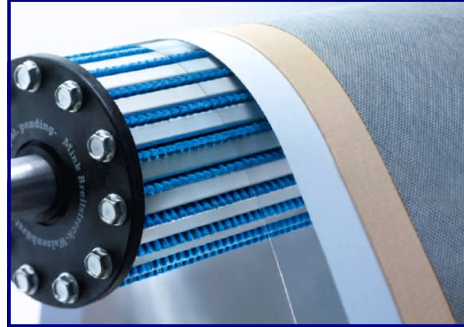

Applications

[View this message in a browser.](#)

The brush rolls can be mounted as:

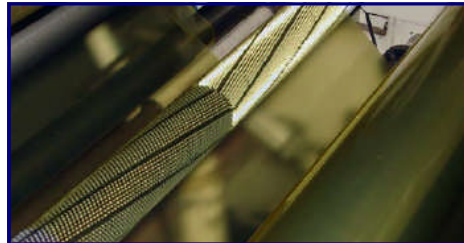

- Stretcher rollers
- Idler rollers
- Dancer rollers
- Rollers for oscillating nips
- Collapser frame rollers
- Lay-on rollers
- Rollers for folding applications

The roller push the film from the middle and towards the edge to ensure that the film is kept completely smooth no matter where the roller is placed in the line.

The film driven brush roll ensures an effective and uniform straightening action.

A substitute for conventional banana rollers: part of a turner bar system in a plastic film extrusion machine.

Spreading, multi-slitting and static removal in one operation.

Very high web speeds thanks to dynamic balancing.

The rollers are easily integrated into new and existing equipment.
